

DeviceMaster Firmware Binary Format

Please note that you must use one the following applications to load DeviceMaster firmware that contains a **.cmtl** file extension:

- [PortVision DX v3.03](#) or higher
- [Linux Firmware Upload Utility v1.06](#) or higher

Existing Customers

The format of DeviceMaster binary files have changed from **.bin** to **.cmtl**.

PortVision DX v3.03 or higher will also allow you to load older **.bin** files on applicable models, if you select **.bin** in the drop down as shown below.
