Mounting Kit
Quick Installation Guide

Overview

Use the following information to attach the mounting kit to the DeviceMaster RTS/LT16.

Note: *If you want to mount this onto the Comtrol DeviceMaster Rack Mount shelf, you also need to purchase part number: 99160-1.*

Kit Contents

This kit contains the following:

- Two DeviceMaster RTS/LT16 Panel/Rack Mount Brackets
- Four 4-40, 1/4" Phillips Pan Head screws
- Four 4-40, 1/2" Phillips screws
- Four 4-40 black Keps Nuts

Requirements

To install the kit, you will need the following:

- DeviceMaster RTS/LT16
- Phillips screw driver
- 5/16" nut driver (if also installing the Rack Mount Shelf)

Installing the Mounting Kit to the DeviceMaster RTS/LT16

You can refer to the following drawings for installation procedures or view the 3D animation at: http://www.comtrol.com/ethernet-device-servers/devicemaster-rts/devicemaster-lt16.

1. Remove the four Phillips screws from the sides of the DeviceMaster RTS/LT16.

2. Align the bracket with the DeviceMaster RTS/LT16 and attach the bracket with the 1/4" Phillips Pan Head screws shipped in the kit.
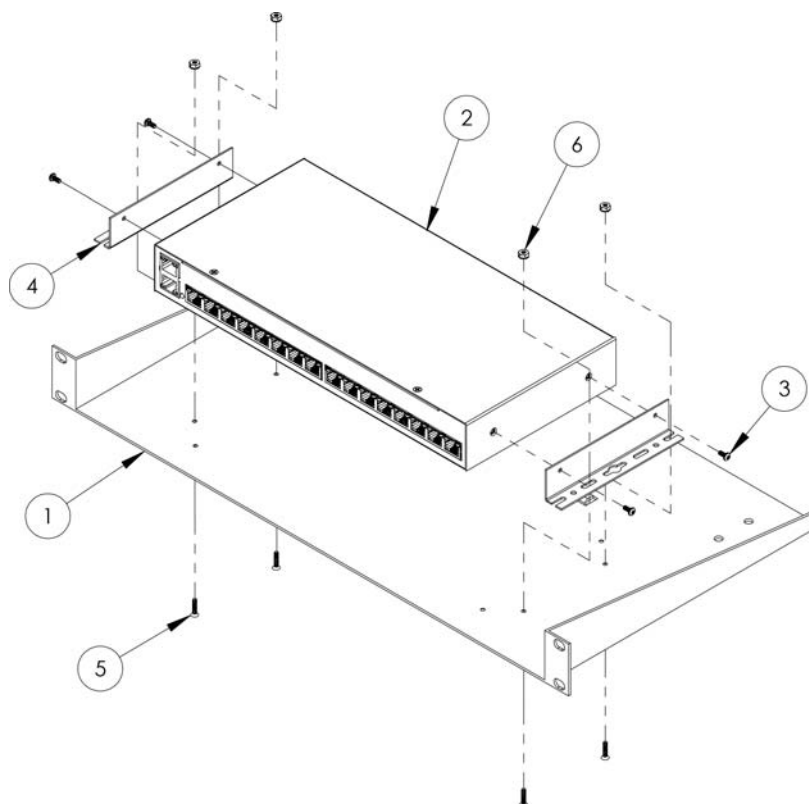

Mounting to a Panel or Wall

You can use one of the two following options to mount the DeviceMaster RTS/LT16 on a panel or wall.

Mounting to the Comtrol Rack Mount Shelf
