RRAS Configuration Overview for Windows XP
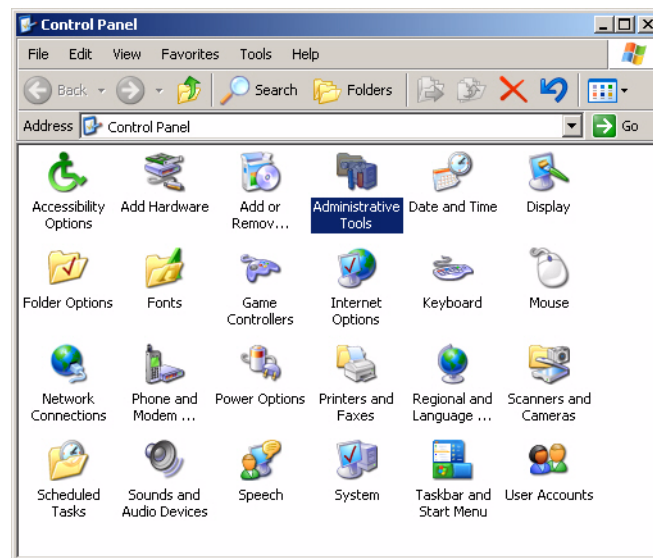

> **Note:** This document contains sample procedures to assist you in quickly enabling RRAS and installing a modem in RRAS. There are several ways in which to do this. If you are familiar with a different method, feel free to use your own method.
>
> This is not a complete procedure for configuring RRAS. For additional information, use the Microsoft help system or contact Microsoft Corporation for more in depth RRAS support.
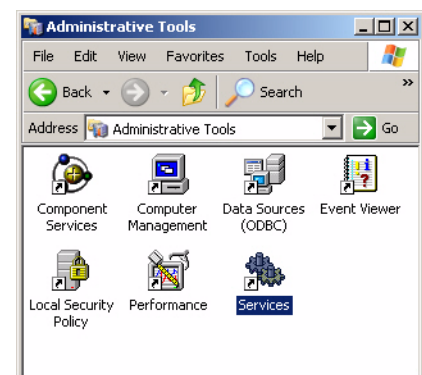

Setting Up RRAS

Use the following procedure as a reference to set up RRAS in Windows XP.
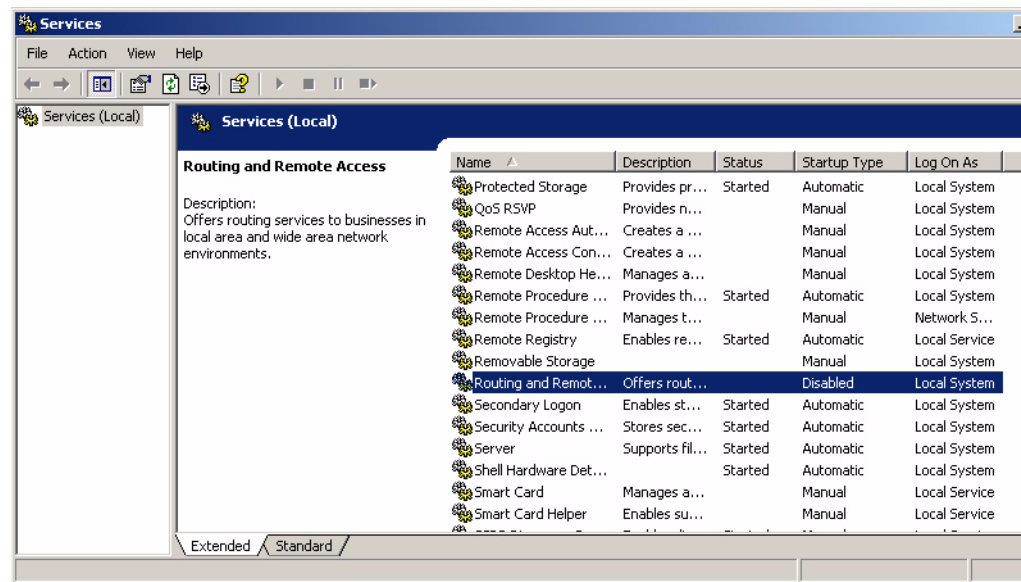

1. Open the Control Panel (from the **Start** button) and select **Administrative Tools**.

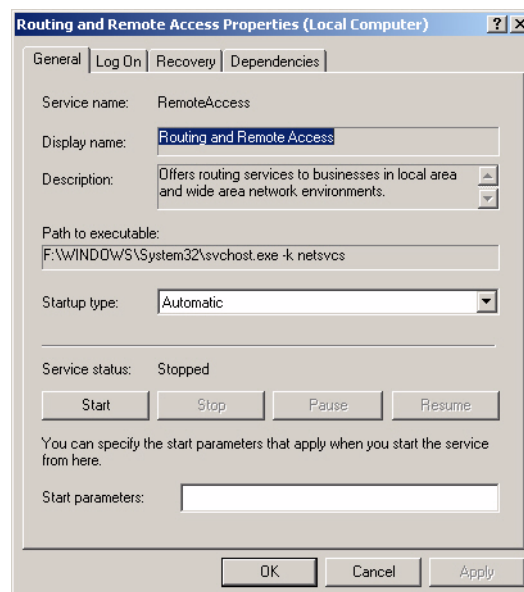

2. Double-click on the **Services** icon.

3. Right-click on the **Routing and Remote Access** entry and select **Properties**.

4. Select **Automatic** from the **Startup type** drop list.

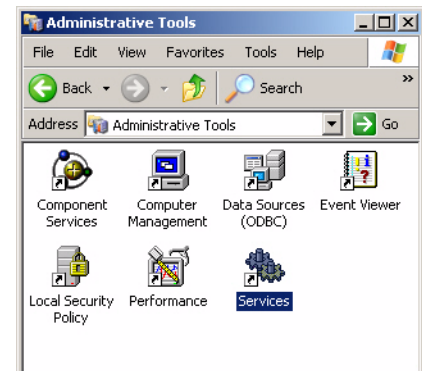

5. Select the **Start** button.

6. Select **Ok** to close the Routing and Remote Access Properties (Local Computer) window.

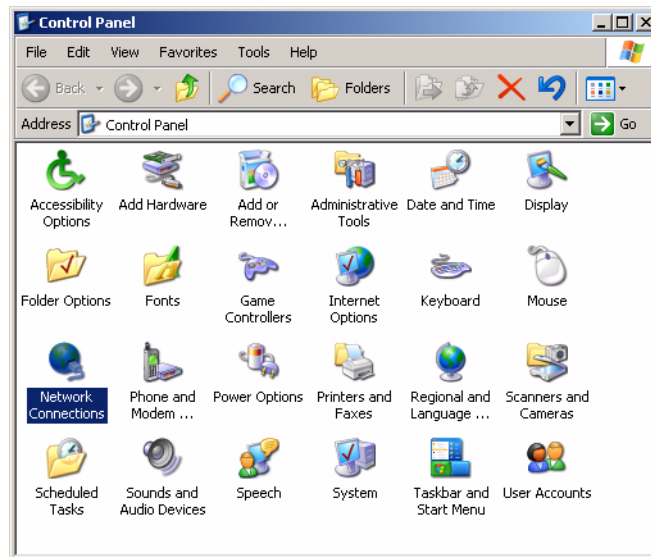

7. Close the **Services** control panel.

8. Close the **Administrative Tools** Control panel.

Adding Modem to RRAS

Use the following procedure as a reference if you need assistance with setting up incoming calls on a modem port.
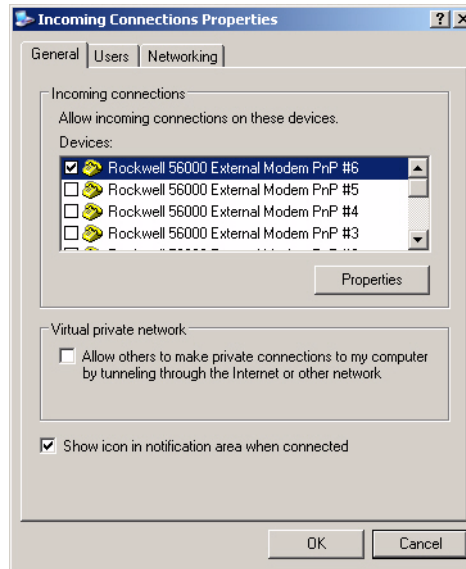

1. Open the Control Panel, right-click the **Network Connections** icon, and select **Open**.
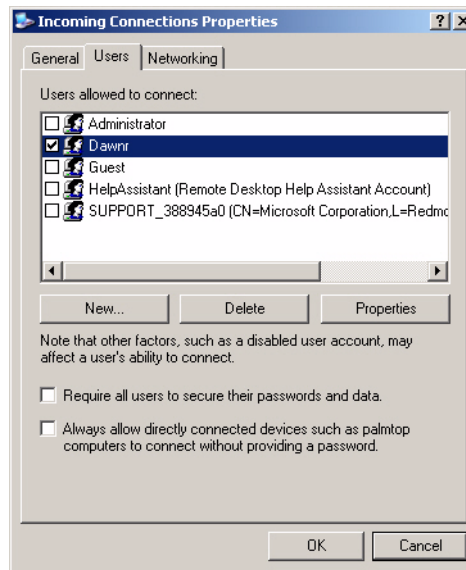

2. Right-click the **Incoming Connections** icon and select **Properties**.

3. Select the modem or modems that you want to setting up incoming calls upon.

4. Select the **Users** tab and select the users that are permitted dial-in permission.

Note: *If necessary, use the Add button to add addition users.*

5. Select the **Networking** tab, configure any necessary protocols, and select **Ok**.

6. Close the Network Connections control panel.
